Chrome Static Assembly Product Code: Z9031

Information

Chrome Static Assembly

The male instantaneous plug is fitted with a 80mm (3") Chrome plated gauge range 0–140 mhd/bar and vent cock.

The device is used to take static pressure readings at the hydrant standpipe outlet. It has the facility of a built-in vent cock to allow the user to vent off the pressure within the line once the supply has been isolated. This allows safe removal of the assembly without damage to the operator or the gauge.
