- Digital pressure gauge 0-30bar, fitted to a bleed valve assembly, which is set at a 45° angle for ease of use.
- A selection of tap adaptors

Digital Pressure Gauge (0 – 30 Bar)

Accuracy 1%

The 63mm (2 ½”) diameter digital pressure gauge provides the following units of measure:

Bar, PSI, MPa, KPa, Kg/cm²

The simplicity of the gauge means that the user can easily navigate between units by simply pressing the ‘unit’ button until the desired unit of measure is reached. The right hand button allows the user to zero the scale. Holding down the ‘unit’ button switches the unit On or Off

The gauge has the added advantage of a stainless steel constructed body and the battery compartment is easily accessed from the rear of the gauge.

The gauge uses 2 x AAA batteries, supplied.
