Please Note:

The logger can be purchased without the comms cable if required (Part No. 15105A)

The comms cable can also be purchased separately (Part No. 15105B)

PrimeLog+ is a small, robust and submersible battery powered data logger designed to meet a wide range of applications.

Available in single and dual channel variants; it is ideal for network modelling applications with $\pm 0.1\%$ accuracy.

Combined with its 2Gbyte of memory, it enables logging of a higher resolution and provides excellent reliability of data.

Its advanced features make it an indispensable tool for any analyst.

Features

- Compatible with all common flow meters
- Rapid USB local communications
- Large 2Gb memory (500 million readings)
- Interval and event logging
- Logs minimum, maximum and average values
- Waterproof and submersible to IP68
- Battery life 5 years (in majority of applications)

Pressure management and pipeline pressure testing

For accurate pressure data the auto-calibration facility and $\pm 0.1\%$ (FS) accuracy are ideal. Logging can be carried out at one second intervals
