The items shown in the photographs are for illustration only and do not include any equipment shown in the boxes.

The cases are fitted with a water repellent type foam with individual cut-outs to suit the various equipment to be stored. Both cases also feature an IP65 water and dust seal. Another unique feature is the latching system that allows the top case to simply click into position when mounted on top of the wheeled case.

The cases are manufactured from Polypropylene with the advantage of being fitted with 8" diameter wheels which provide greater stability when operating over uneven terrain.

Both cases also have provision of being able to fit a padlock if required and have a telescopic handle to assist with storage.

The bottom case also has the benefit of a detachable handle.

Note: There is a similar pair of cases for the Flowmaster 250/250 MK2 (Product No. VMFMCASE1).

Dimensions:

Wheeled case

Height (handle in the retracted position) = 715mm

Height (handle in the extended position) = 985mm

Width = 555mm (610mm including wheels)

Depth = 500mm

Top ancillary case

Height = 310mm

Width = 555mm

Depth = 365mm
